

# StackDX Rollout — PrairieSky Well Data Requirement Sheet

Instructions for Existing StackDX Clients

**StackDX**

# Existing StackDX Clients

PrairieSky has launched an external project in StackDX — you can now transfer all required well documents directly from your well file to PrairieSky's, using the same workflow you already know.

## Training Webinar

April 21 | 1:30 – 2:30 PM (MT) via Microsoft Teams.  
Covers locating PrairieSky under External Projects, initiating transfers, and confirming submissions.  
Session will be recorded. Watch for your training invite from [hello@stackdx.com](mailto:hello@stackdx.com).

## Don't Have the Wells Module?

Don't have the Wells module? Add it to your Stack subscription and share directly with PrairieSky—no double uploads. Contact [hello@stackdx.com](mailto:hello@stackdx.com) to get started.

# Key Dates & Next Steps — Existing Stack Clients

Your primary action item is attending the April 21 training webinar. Complete each step below before the indicated date.

## Questions or Technical Issues?

Platform support: [hello@stackdx.com](mailto:hello@stackdx.com). Well Data Requirements or business questions: contact [welldata@prairiesky.com](mailto:welldata@prairiesky.com) or your PrairieSky Land Representative.

## Don't Forget

- RSVP for training and forward internally as required
- Training will be recorded if you can't attend live
- StackDX only from May 1 — no exceptions
